

# 3D Structured Film

GRISH 3D structured films have reduplicative 3D patterns such as cubic, pyramid, prismatic, diamond pattern and so on. It contains fine abrasives inside patterns. These patterns have uniform height, and show consistent and durable polishing ability.

## Specification

Abrasive Grit Size	Aluminum Oxide (AO)	Aluminum Hydroxide (AOH)	Cerium Oxide (CO)	Calcium Carbonate (CaCO <sub>3</sub> )
45μm #360	●			
30μm #600	●			
15μm #1200	●			●
9μm #2000	●	●		●
5μm #3000	●	●		●
3μm #4000	●	●		
1μm #8000			●	
0.5μm #10000			●	
3D Structure	Pyramid, Square, Prismatic, Diamond			
Base material	PET			
Standard size	Polishing belt:15mm*838mm, 30mm*1600mm Grooved lapping film:55mm*74mm, 55mm*80mm, 55mm*100mm, 55mm*140mm			

Remark: Customizations are available upon requests.

## Applications

◆ LCD panel

◆ Glass Scratches repair

◆ Car body paint repair

◆ Metal

## Features

- ◆ Durable polishing performance with uniform abrasive module.
- ◆ Consistent removal rate with self-dressing characteristics.
- ◆ Discharge polishing debris through grooves among patterns.
